

PRBB Intervals Course Proposal

Course Title: Navigating turbulent times: time management and resilience in science

Proposed dates: 15th & 22nd June 2022

Course Language: English

Course Leader and very brief summary of relevant qualifications and experience

Louise Schubert works as an executive coach, coach supervisor, consultant, and trainer and was recently accredited as a resilience coach. She supports professionals from all disciplines to improve their overall performance management and leadership skills.

Rationale for course (why is this course of interest for the PRBB staff?)

The impact of the COVID 19 pandemic, which has compounded the already eroded boundaries in our lives, means that many people suffer from feelings of being overwhelmed and disempowered. They find it difficult to carve out time for the things that are important in their lives. They also struggle to focus on one task at a time. These pressures can cause frustration, a lowering of self-esteem and a feeling of not being able to cope.

Course aim – general

Participants will take a step back from busy schedules and day to day responsibilities. They will have the chance to reflect on their current work practices, the priorities which guide them and the challenges they face daily. They will discover alternative approaches to the management of time and energy levels, so that greater efficiency and enjoyment will be experienced in both their professional and personal lives.

Specific learning outcomes (what new skills, knowledge &/or attitudes will participants take away from the course?)

- Demonstrate greater control when handling the day-to-day processes and interactions with others
- Work more efficiently and effectively in the achievement of work objectives and so increase overall performance
- Address any serious work/life balance issues
- Review the way you organize yourself and reflect on your own assumptions, to find long lasting solutions.
- Decrease feelings of stress in the work and home environment

Course contents (outline of topics to be covered)

- Where does my time go? Individual and work in pairs to consider themes arising from the pre-course preparation exercise.
- Individual reflection on knowing myself:
 - Purpose: what are my professional goals?
 - Personal strengths: what are the associated time management issues?
 - Life scripts: how do these impact my approach to time management?

- Personal organization and setting priorities
- Dealing with stress: Self-management in challenging situations.
 - Developing resilience and self care.
 - Introduction of basic mindfulness and self-awareness exercises.
- Handy hints on how to improve control of time from now on.
- Action plan and how to carry it forward.

Training methods

This course will be face to face in the PRBB training rooms.

Pre-course preparation using a questionnaire and completion of a time log is required before arrival.

During the programme: Individual exercises, sharing and discovery with others, in depth discussions over key areas of concern, viewing of a short video. There is some theoretical input; however, the facilitator uses the Socratic approach where participants will uncover what works best for them. A relaxation exercise is introduced in the second part and at the end participants will be invited to draw up action plans and think about the support that they need to make the desired changes in their day to day.

Target group in PRBB (Senior scientists, postdocs, predocs, management/admin staff, all residents)

Open to people at all levels. All PRBB residents.

Number of participants (maximum)

12 per group

Total course hours

Note: only the direct training hours will be included in the post-course certificate.

Number of hours of class time: 8 hours

Number of hours of self-study: 1.5-2 hours

Distribution of course (hours/days)

2 sessions: 2 x 4hrs

Pre-course preparation and/or between sessions?

Participants answer a pre-course questionnaire and to observe themselves using the time log over a period of 5 working days.

Material participants need to bring (laptops, etc...)

Preparatory work and reflections
