

PRBB Intervals Course Proposal

Course Title

Project management for scientists

Proposed date(s):

- Day 1: Thursday 18th April
- Day 2: Friday 19th April
- Day 3: Thursday 2nd May
- Day 4: Thursday 16th May

Course Language: English

Course Leader(s) and very brief summary of relevant qualifications and experience

- **Joaquim Calbó holds** a PhD in Biochemistry and has extensive training and experience both as researcher (University of Barcelona, Temple University – Philadelphia, and The Netherlands Cancer Institute) and as research manager (IRB Barcelona, CRG, and currently at VHIR). He is the Director of the Competitive Research Area at the Vall d’Hebron Institute of Research (VHIR), managing all pre- and post-award activities for national and international grants.
- **Alexandros Nikolaou** holds a PhD in Bio-engineering from the Vrije Universiteit Brussel, Belgium. Since 2015, he worked as a Pre-award Grants Specialist and Scientific Project Manager at CRG, IDIAP Jordi Gol and currently at Flomics Biotech. Alex followed specialized trainings from the European Commission and from the Spanish Office for Science and Technology (SOST) in Brussels.

Rationale for course (why is this course of interest for the PRBB staff?)

Enable scientists to apply project management techniques in order to better define objectives of a research project, make a realistic plan, and implement it effectively.

Course aim – general

To discover the real value of project management in research and learn how to apply it to your projects. This course does not cover time management nor leadership techniques.

Specific learning outcomes (what new skills, knowledge &/or attitudes will participants take away from the course?)

After this workshop you will be able to:

- Define clear objectives and key success factors
- Identify and manage relations with stakeholders
- Plan a project according to objectives and available resources
- Identify and control risks
- Monitor progress and report
- Evaluate outcome of your project
- Apply the concepts and methodologies of project management to any kind of project

Course contents (outline of topics to be covered)

What is a Project?
Fundamentals of Project Management
Project initiation and its life cycle
Work plan: from mission to deliverables
Budget planning and financial monitoring
Project implementation, monitoring, and closing
Collaborative Projects

Training methods

Interactive sessions in-person
Moodle platform
Case studies
Interactive group work (incl. peer-to-peer evaluation)
Invited talks from experts

Target group in PRBB (Senior scientists, postdocs, predocs, management/admin staff, all residents)

Postdocs, staff scientists and technicians with managing responsibilities

Number of participants (maximum)

16

Total course hours (Please specify: direct training with instructor present and required self-study)

Note: only the direct training hours will be included in the post-course certificate.

Number of hours of class time: 16h
Number of hours of self-study: 10h
Total number of course hours: 26h

Distribution of course (hours/days)

4 half days (mornings), 9:30 – 13:30

Pre-course preparation and/or between sessions?

- Short pre-course survey
- As preparation for sessions 3 and 4 participants are expected to do some individual study (about 10h). Course instructors will be available for one-to-one consultation.

Material participants need to bring (laptops, etc...)

Material to take notes.

Relevant background reading/ audiovisual/websites or other materials

The course material will be shared on a Moodle platform.
